

K-LOVE is a radio station used by several people in our area. I am concerned that the LowPower FM service will not allow us to obtain the channel as we currently do under the FM translator. This radio station is listener-supported and is very valuable to many people. It is family friendly, offers support if someone is in crisis, etc. It's services are invaluable. Please strongly consider maintaining a method that will keep this station on the air. I continue to help the station financially and my children and I would feel a huge loss if the station was not available. It has uplifted us through hard times, and has been enjoyed during good times. I know that many people use the counseling and prayer support available by contacting the station. I have heard testimonies of this station encouraging people to turn their lives around and to seek help at local shelters, etc. I know of no other local radio station that offers these public services for their listeners. K-LOVE must be able to reach a wide mileage area in order for its' communities to be served - locally, throughout the US, and around the world. Please do not allow a LPFM station to take priority over FM translator service. Thank you for your consideration in this matter.
